

Header Menu Guide

Adding a Category to the Website Navigation

A short, plain-language guide to the new "Header Menu" admin page — how to add a new item (like "Necklace" or "Earrings") to the MEN / WOMEN / GIFTS / COLLECTION dropdown menus on the live website, without needing a developer.

Where to Find It

Log in to the admin panel and open **Header Menu** in the left sidebar (below "Sub-categories"). This page controls the dropdown lists that appear when a visitor hovers over **MEN**, **WOMEN**, **GIFTS**, or **COLLECTION** at the top of the website.

Note: The existing items you see today (Rings, Bracelet, Chain, Anklets, Toe Rings, Mangalsutra under WOMEN, for example) were built into the website's code and are not listed here — they always stay. This page only manages items *you add on top of them*. New items appear at the bottom of the dropdown.

STEP BY STEP

- 1 **Click "Add Menu Item"** at the top right of the Header Menu page.
- 2 **Choose the Menu** — pick which dropdown the new item should appear in: Women, Men, Gifts, or Collection.
- 3 **Type the Item Name** — this is exactly what visitors will see in the dropdown, e.g. "Necklace" or "Earrings".
- 4 **Choose "Links to Category"** — pick which product category this item should show when clicked. This list is the same set of categories used on the "Add Product" form.
- 5 **Click "Add"** — the item is saved and appears on the live site immediately, no redeploy or cache refresh needed.

WHAT THE FIELDS MEAN

FIELD	WHAT IT DOES
Menu	Which top navigation dropdown the item belongs to (Women, Men, Gifts, Collection).
Item Name	The visible label in the dropdown, e.g. "Necklace".
Links to Category	When clicked, the item takes visitors to the products page filtered to this category.

Important: Only add a category here once there are products assigned to it (via the "Category" field on the Add Product page, or "Category Images"). If no products use that category yet, visitors who click the new menu item will land on an empty "No pieces found" page.

Removing an Item

Any item you've added shows up in a list under its menu name on the Header Menu page, with a trash icon on the right. Click it to remove the item from the live site immediately. Items that were built into the website's code cannot be removed from this page.

Example

To add "Necklace" under the WOMEN dropdown:

1. FILL THE FORM

Menu: **Women**

Item Name: **Necklace**

Links to Category: **Necklace** (or whichever category your necklace products use)

2. RESULT ON THE SITE

Hovering WOMEN in the header now shows Rings, Bracelet, Chain, Anklets, Toe Rings, Mangalsutra, and **Necklace** at the bottom. Clicking it shows all products in that category.
